Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, 37-41, drawn to a rigid reticulated article and process of producing thereof, classified in class 623, subclass 23.51.
- II. Claims 27-36, drawn to method of forming a ceramic article, classified in class 623, subclass 23.51.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. The article, and process of making that article, of Group I does not require a porous osteoinductive composition being exposed to interconnected openings, as the method of Group II requires.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Todd Burnes on ^{11/13/01}~~10/23/01~~ to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
